

Artificial Intelligence (AI) is invading all walks of life in the current world. Various AI tools are available that produce human-like results. ChatGPT, Gemini, Copilot, Meta are some of the popular AI tools. Julius, Copy, Alteryx, Fliki, SlideAI and many more are lesser-known ones. Ethical and responsible use of these AI tools save time, enhance the skills, productivity and output quality of NGO staff and researchers.

Objective of the event:

To introduce the amazing world of AI tools and to demonstrate their ethical use in day-to-day work of NGO staff and researchers.

Target Participants:

Program & finance staff of NGOs; researchers at academic institutions; scholars / students; professionals in private and Govt. sectors.

Contents of the Training:

1. Text processing, condensing, generation, translation, styling
2. Image creation, editing, processing, video generation from text, text-to-image etc.
3. Data processing, condensation, analysis, interpretation, visualization etc.
4. Combining data, text and images into logical concept notes, reports and case studies in jiffy

Language of the Event: English

Resource Person: R.V.Ramamohan M.E., PhD
 Ramamohan has got about 26 years' experience in planning, design, implementation and evaluation of various NRM projects in India. He organized 16 similar capacity building events for NGOs, researchers & Govt. staff in the last 6 years.

Practical Training
on
AI Tools – Ethical Applications
to Enhance the Productivity of
NGO staff and Researchers
